SUMMARY

Software Developer with professional QA and automation experience at Microchip and a background in Linux system administration and network infrastructure from the Israeli Air Force. Skilled in Python, C#, Java, JavaScript/React, Docker, and Bash scripting on Ubuntu-based environments, with a track record of building automation that measurably improved team efficiency. 1st-place hackathon winner with full-stack and mobile development project experience.

SKILLS

Languages: Python, C#, Java, C++, JavaScript, TypeScript, SQL, Bash, Terraform

Frameworks & Libraries: React, React Native, Node.js, Socket.IO, D3.js, JWT, MongoDB

Tools & Platforms: Docker, Kubernetes, Linux, Git, Android, iOS, Unity, Jenkins

Linux & System Administration: Ubuntu, Bash Scripting, Log Analysis, File System Management, System Diagnostics

AI-Assisted Development: Claude, Copilot, Cursor

EXPERIENCE

Microchip — QA Tester Jan 2022 – Jun 2023

- Developed and executed 4 test plans and Python automations, identifying and documenting issues with detailed reports, leading to 60% improved lead times across 2 product lines.
- Conducted comprehensive testing of hardware components; collaborated with a cross-functional team of 3 engineers and 3 operation staff to troubleshoot and resolve hardware/software integration issues.

Israeli Air Force (IAF) — Network & Communication Technologies Supervisor

Apr 2018 – Dec 2020

- Administered Ubuntu-based Linux and Windows network systems serving 100+ users, managing file systems, user permissions, and service configurations to ensure 99%+ uptime and seamless operational communication.
- Leveraged Docker to containerize 5+ internal network tools and developed Python/Bash scripts to automate routine system diagnostics and configuration tasks, reducing issue resolution time by 30%.
- Automated network performance monitoring by writing custom scripts to parse logs and alert on critical system faults, leading to 20% improvement in lead time.

PCGalaxy.co.il — Editor in Chief Apr 2014 – Sep 2019 (concurrent with military service)

- Authored 1,000+ in-depth reviews and articles on PC games, growing to a readership of 100,000+ monthly visitors and improving overall site reach by 50%.
- Established business and press relations with 10+ game publishers and developers; planned and conducted 30+ written and voice-recorded interviews with industry experts.

Career Note: Medical recovery following military service (Jan 2021 – Dec 2021). Full-time B.Sc. student since 2023.

PROJECTS

Academic projects during B.Sc. at Holon Institute of Technology, 2023–2026

- 1st Place Hackathon Winner:** Led a team of 4 to scope and develop a functional MVP within a 32-hour sprint, addressing a critical hospitality vulnerability. Built with TypeScript and React Native.
- Predictive Tracking App:** Developed a Java mobile application to track and predict chronic pain levels for 500+ daily data points, designing an intuitive data-entry flow that translated complex health metrics into actionable insights.
- Social Network App:** Engineered a full-stack mobile social network with real-time chat (Socket.IO), JWT auth, MongoDB, and D3.js charts. Built with JavaScript and React Native.

EDUCATION

Holon Institute of Technology (HIT) — B.Sc. Computer Science, Software Engineering Emphasis | 2023 – 2026

Languages: Hebrew (Native) | English (Fluent) | Spanish (Basic)
